2.Create table and joins in MySQL

Code:

Create table:

```
CREATE TABLE Customers (  
    CustomerID int,  
    FirstName varchar(255),  
    LastName varchar(255),  
    Email varchar(255),  
    PRIMARY KEY (CustomerID)  
);
```

The screenshot shows a MySQL IDE interface. The top panel displays the SQL code for creating the 'Customers' table. The bottom panel shows the 'Output' window with a list of executed actions and their results.

SQL Code:

```
37 LastName varchar(255),  
38 Email varchar(255),  
39 PRIMARY KEY (CustomerID)  
40 );  
41  
42 SELECT * FROM Customers;
```

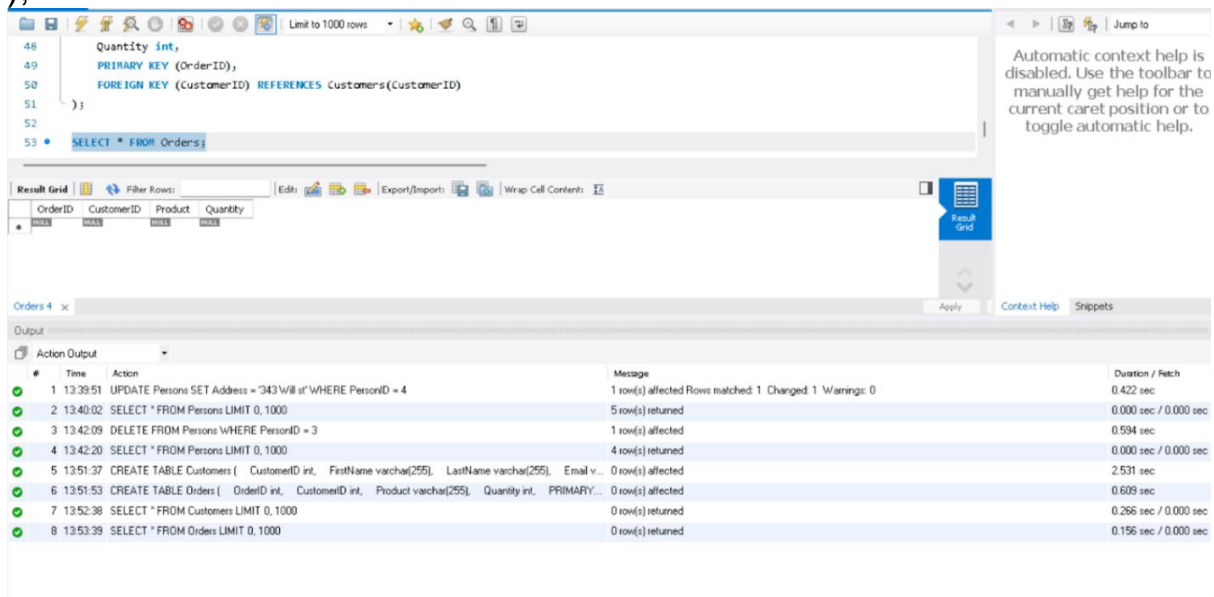

Output Window:
